TECHNICAL SKILLS

Programming Languages: Java, Python, SQL, JavaScript, TypeScript
Backend & Architecture: FastAPI, Node.js, Express.js, RESTful APIs, Asynchronous Task Processing
Databases & Caching: PostgreSQL, Redis, MySQL, MongoDB, Supabase, Database Indexing
DevOps & Cloud: Docker, AWS (EC2, VPC, IAM, ELB), Celery, Git, GitHub, Linux CLI
Core Computer Science: Data Structures & Algorithms (DSA), OOP, DBMS, Operating Systems, SDLC

KEY PROJECTS

RepoHub — Distributed GitHub Developer Analytics Platform

React, FastAPI, PostgreSQL, Redis, Celery, Docker, GitHub API

- Architected a full-stack developer analytics platform utilizing FastAPI, PostgreSQL, and React to ingest, aggregate, and visualize multi-dimensional developer activity metrics.
- Engineered asynchronous background pipelines via Celery and Redis to offload heavy repository syncs, reducing initial HTTP endpoint latency from ~4.5s to <150ms (95%+ reduction) and eliminating timeouts.
- Implemented Redis caching with TTL and Celery exponential backoff, reducing redundant GitHub API calls by ~70% and preventing 429 rate-limit threshold breaches.
- Designed indexed PostgreSQL schemas to process and aggregate 8+ developer velocity dimensions across 1,000+ commits in <50ms query time; implemented secure auth via GitHub OAuth 2.0 and JWT.

IPQuest — Gamified Intellectual Property Learning Platform (Published Patent)

Node.js, Express.js, MongoDB, REST APIs, OpenAI API

- Engineered a full-stack educational web application delivering gamified IPR modules, interactive quizzes, and real-time conceptual evaluation mechanisms.
- Designed and deployed scalable RESTful API endpoints in Express.js with MongoDB for dynamic content delivery, state management, and real-time scoring.
- Integrated an AI-assisted explanation pipeline using LLM APIs for automated, contextual remediation of complex legal and technical queries; awarded a Published Patent for the system's design.

MediBook — Healthcare Appointment Booking System

FastAPI, MongoDB, React.js, JWT, REST Architecture

- Developed a full-stack scheduling application in FastAPI and React following modular REST architecture.
- Implemented role-based access control (RBAC) and secure session management using JWT authentication.
- Engineered database queries with custom MongoDB indexing and backend validation schemas to prevent conflicting booking states and ensure transactional integrity.

PROFESSIONAL EXPERIENCE

Data Analytics Intern — Oasis Infobyte

Dec 2024 – Jan 2025 | Remote

- Executed Exploratory Data Analysis (EDA) and automated data cleaning pipelines using Python (Pandas) and SQL to preprocess raw datasets and eliminate anomalies.
- Structured visual reporting dashboards in Tableau to track key operational metrics and trends for weekly stakeholder review.

Web Development Intern — Sumago Infotech

Jun 2022 – Jul 2022 | Nashik, India

- Engineered responsive web interfaces utilizing HTML5, CSS3, and JavaScript with optimized DOM manipulation and client-side event architectures.
- Automated routine testing and data preparation tasks by developing internal Python scripts.
- Collaborated across the full Software Development Life Cycle (SDLC), utilizing Git for branching, code reviews, and bug tracking.

PATENTS & INTELLECTUAL PROPERTY

Patent: "IP Quest — Interactive Gamified Learning Platform for Intellectual Property Rights"

Status: Published | Application/Publication No: 202521131199 (Indian Patent Office)

- Innovated an interactive architecture combining algorithmic assessment and simulation to accelerate technical comprehension.

EDUCATION

Bachelor of Engineering (B.E.) in Information Technology

2023 – 2026

JSPM's Jayawantrao Sawant College of Engineering, Pune | CGPA: 7.79 / 10.0

Diploma in Computer Technology

2020 – 2023

K K Wagh Polytechnic, Nashik | Aggregate: 78.91%
